

LEARNING NO MATTER YOUR UNDERSTANDING

...please call us for more information

Are you new to Real Estate or Property Management?

Do you have new members on your team that you need to get up to speed?

Do you need a refresher on Environmental Engineering Standards?

Do you need Materials Awareness training?

Do you understand the Environmental Assessment process?

Whether you are in construction, finance, property management or other related field, we can help you stay up-to-date or offer training to newbies in your firm. Fisher Engineering can host a variety of educational workshops or informative sessions for you and your staff.

The programs are designed to communicate information and/or evaluate environmental and workplace conditions. We aim to promote health, safety, protection of the environment, and it's regulatory compliance when it comes to property acquisition, development, and management. Topics can include, but are not limited to:

Overview of Environmental Site Assessments: (ESA)

- Why you need them, how to conduct them, or understanding the processes.

Awareness Training of Hazardous and Designated Substances:

- How to safely and appropriately identify and follow regulations including sample collection such as potential asbestos, mould, and other designated substances.

Familiarization or update with the latest Ministry's environmental guidelines:

- Regulations change and it is hard to keep up.

Overview of Fisher's services and/or environmental processes in relation to your needs, projects or industry.

- This is an informal session that offers information, while helping you understand where we might help as well as a chance for each of us to get to know each other.

Some of our workshops are free-of-charge through **Lunch & Learn** presentations. Specialized or custom training comes with a fee that we will quote after a discussion of your needs. If you are looking to implement and understand safe, healthy and environmentally responsible workplace practices, get in touch with us. You'll find us at: fisherenvironmental.com. Sign up so you'll never miss out on a *Fisher File* and call us for a chat!
